EXPERIENCE

Fullstack Developer, Guru Group LLCDec 2022 – Present

Guru Group is a Microsoft Gold Partner based in the USA, providing advanced IT services including Dynamics 365, Power Platform, Salesforce, and SAP. Known for staff augmentation and digital innovation, the company delivers enterprise-grade technology solutions across multiple industries.

- Developed dynamic dashboards and admin panels using React.js and Next.js
- Built secure backend features using Next.js API routes, implementing JWT authentication, middleware-based route protection, and session management.
- Ensured code scalability with component-based architecture and reusable UI patterns.
- Used Vercel and GitHub Actions for automated deployment pipelines.

Frontend Developer, ZanimTechFeb 2022 – Nov 2022

- Designed and developed responsive user interfaces for internal tools and client projects using React.js and Next.js, enhancing UI consistency and usability.
- Collaborated with senior developers to implement new features from design mockups, translating requirements into maintainable, production-ready code.
- Utilized Git for version control and participated in Agile sprint meetings and code reviews, ensuring efficient team collaboration and adherence to best practices.
- Built clean, component-based UI architectures to promote code reusability and scalability across multiple projects.

PROJECTS

Reflect – Mental Health & Journaling App

Developed a fullstack journaling platform using Next.js and React, focused on wellness and self-reflection.

- Implemented features for rich text entry, mood tracking, and personalized daily prompts.
- Built backend functionality using Next.js API routes for secure form handling and data submission.
- Deployed on Vercel with optimized performance and accessibility across all devices.

AI SEO

Created a modern, responsive landing page for an AI-powered SEO tool using Next.js and Tailwind CSS.

- Added Framer Motion animations for a smooth and interactive user experience.
- Designed with a dark UI theme to maintain a clean and professional look.
- Live deployment via Vercel.

Task Manager

Designed and built a responsive landing page for a productivity-focused SaaS product.

- Developed multi-section layout using Next.js, Tailwind CSS, and Framer Motion.
- Built UI components for hero section, pricing tiers, testimonials, and call-to-action elements.
- Ensured mobile responsiveness and implemented pixel-perfect designs from Figma.
- Deployed live on Vercel.

EDUCATION

Virtual UniversitySep 2020 – Nov 2024

- Bachelor of Business and Information Technology (BBIT)

Aptech InstituteJan 2019 – Jun 2021

- Higher Diploma in Software Engineering

ACHIEVEMENTS

- Secured 3rd position in the Aptech Inter-Campus Coding Competition.
- Consistently recognized for writing clean, reusable React/Next.js code during peer reviews and Agile team retrospectives (Guru Group LLC).
